Patient Participation Group

Broom Valley Medical Centre is currently setting up a Patient Participation Group. The aims of the group are as follows:

- To review practice performance
- To work with the practice to develop and improve services
- To support the wider practice population
- To communicate and seek views of others.
- To be given an insight of the modernization of the NHS in Rotherham

The group will consist of a cross section of patients and will be supported by the practice staff, this will generally involve a GP and the practice manager.

The group will aim to meet for an hour approximately every two to three months, this will be driven by the group and shortly be chaired and run by the group.

If you would be liked to be involved in this group please speak to the practice manager on the above number or ask for him when you are next in the practice.

As a forward thinking practice we feel this group will be of major importance and a huge success as it grows and develops.

We look forward to hearing from you.
