Group Chief Executive’s Statement

These are the BMI Healthcare Quality Accounts for 2017, providing a transparent picture of performance and outcomes of objective metrics on the quality of our 59 hospitals and clinics across the UK.

We have made a significant investment in our hospitals over the course of the year. We have installed new diagnostic equipment, such as MRI and CT scanners, new endoscopy decontamination units and digital mammography. We have also enhanced our services and hospital facilities and are pleased that our cancer centres are achieving Macmillan Quality Environment Marks. Similarly, those hospitals with endoscopy services are working towards achieving Joint Advisory Group (JAG) accreditation, showing they adhere to the highest standards.

Our commitment to developing BMI as a leader in digital healthcare has already seen the introduction of e-prescribing across our cancer centres, with everyone involved in a patient’s care able to access set tumour protocols and real-time information to inform prescribing decisions. Our planned future investment in an electronic patient record has the same aim – to streamline information, ensure this is available to clinicians, reduce duplication and support good systems for patient safety across the entire patient journey.

Quality underpins everything that we do; whether that is in direct patient care or in the systems and processes that we have to promote safe and effective health outcomes. These two aspects of our hospitals work hand in hand, and getting that right is an essential part of our quality agenda.

All our hospitals have now been assessed by the regulator for their country. The Care Quality Commission has published the findings of its inspections of our hospitals in England, assessing them on the five standard criteria of safe, well-led, responsive, caring and effective. We are pleased that the CQC agreed that our staff provide a good level of care across our hospitals and also noted areas of exemplary healthcare in other criteria. Health Improvement Scotland and the Health Inspectorate Wales also highlighted our hospitals in those countries as providing good and very good levels of healthcare.

Ours is a learning organisation, and while we were proud of those areas where we had performed well, we place equal importance on areas where the inspectors said we needed to focus and improve. We invited the CQC to present their thoughts to all our registered managers, so that we can work collaboratively and effectively on issues that may be common to more than one hospital. And our registered managers are also sharing best practice across our network with a process of peer review. Our focus for our hospitals is to work towards the next highest rating in the cycle of regulatory inspections.
Over the course of the year we have brought all our audit processes together into a comprehensive integrated audit programme which covers both clinical and commercial. This will provide a clear overview of status at local hospital level and at Board level. We have put in standard committee structures to improve our governance and standardise management of all parts of the business as well as provide opportunities for staff in all areas to continue their innovative ideas for the benefit of our whole hospital network.

We look both prospectively and retrospectively in identifying and mitigating risks and promote a responsible culture where we are confident to challenge when we see something does not appear correct. Working in this way means we can identify and implement mechanisms and strategies to address risks.

All our hospitals across the BMI Healthcare network are committed to our brand promise to be “serious about health, passionate about care” and its four key themes of safety, clinical effectiveness, patient experience and quality assurance. Our patients agree that we achieve this, with 98.4% agreeing that the quality of their care was very good or excellent. In addition, 98.4% say that they would recommend one of our hospitals to their family and friends. These figures reflect the opinions of patients who select us for their NHS-funded care, of those covered by private medical insurance and of those who choose to pay for their own care.

Our learning culture extends throughout our support, clinical, nursing and medical staff and Consultants. We have adopted new approaches to ‘human factor’ training, building on approaches to minimising risk which have been developed in the airline industry. We have also embedded training and understanding around Duty of Candour, the responsibility we have to explain to patients that might have led to treatment with undesirable outcomes, and a network of Candour Champions.

The information available here in the Quality Accounts has been reviewed by the BMI Healthcare Clinical Governance Committee and I declare that, as far as I am aware, the information contained in these reports is accurate.

I would like to extend my thanks to staff throughout BMI Healthcare whose dedication, experience and expertise has led to the positive outcomes highlighted in this report. Everyone, whether a member of our ground care staff, nursing team, diagnostic departments, contact centre or a part of our corporate teams, all shares the same aim - to provide quality care and an exceptional experience for our patients.

Jill Watts, Group Chief Executive
BMI The Manor Hospital is a private hospital in Biddenham, which is a village near Bedford. The hospital is set within a grade two listed building. It is registered for 23 beds with individual rooms offering the privacy and comfort of en-suite facilities, TV, Wi-Fi and telephone.

The hospital has one operating theatre (with ultra clean ventilation), endoscopy department/minor procedure room. The Outpatient facility includes five recently refurbished consulting rooms plus a minor procedures room.

These facilities combined with the on-site support services including an Imaging department providing X-ray services, Mammography and Ultrasound. Physiotherapy including Hand Therapy services, Health Screening and a private GP service. All services enable our consultants to undertake a wide range of procedures from routine investigations to complex surgery. The specialist expertise is supported by caring and professional medical staff, with dedicated nursing teams and a Resident Medical Officer (RMO) on duty 24 hours a day, providing care within a friendly and comfortable environment.

The hospital undertakes a range of surgical procedures, to patients aged sixteen and over. Out Patient consultations are available six days a week.

The hospital provides NHS funded care, mostly through the NHS referral system. The specialities provided are General Surgery, Gynaecology, Urology and Gastroenterology. NHS Orthopaedics is primarily received as part of the Circle contract. 34% of our overall activity is represented by NHS volume.

The hospital is managed by BMI Healthcare and is part of a network of 61 hospitals and treatment centres across England, Scotland and Wales.

BMI Healthcare are registered as a provider with the Care Quality Commission (CQC) under the Health & Social Care Act 2008 as well with the Hospital Improvement Scotland (HIS) and Healthcare Inspectorate Wales (HIW) for our hospitals outside of England. BMI The Manor Hospital is registered as a location for the following regulated services:-
• Treatment of disease, disorder and injury
• Surgical procedures
• Diagnostic and screening

These regulatory bodies carry out inspections of our hospitals periodically to ensure a maintained compliance with regulatory standards.

The CQC carried out an announced inspection on 6th / 7th October 2015 and an unannounced inspection 14th October 2015 overall found the hospital to requires improvement

Three improvement notices were issued and corresponding action plans have been provided to the CQC. These covered staffing levels, incident management and safe operating system. Immediate changes to practice were introduced including staffing level review, refurbishment and the recruitment of a Quality & Risk Manager.

BMI The Manor Hospital has a local framework through which clinical effectiveness, clinical incidents and clinical quality is monitored and analysed. Where appropriate, action is taken to continuously improve the quality of care. This is through the work of a multidisciplinary group and the Medical Advisory Committee.

At a Corporate Level, BMI Healthcares Clinical Governance Board has an overview and provides the strategic leadership for corporate learning and quality improvement.

There has been ongoing focus on robust reporting of all incidents, near misses and outcomes. Data quality has been improved by ongoing training and database improvements. New reporting modules have increased the speed at which reports are available and the range of fields for analysis. This ensures the availability of information for effective clinical governance with implementation of appropriate actions to prevent recurrences in order to improve quality and safety for patients, visitors and staff.

At present we provide full, standardised information to the NHS, including coding of procedures, diagnoses and co-morbidities and PROMs for NHS patients. There are additional external reporting requirements for CQC/HIS/HIW, Public Health England (Previously HPA) CCGs and Insurers.

BMI Healthcare is a founding member of the Private Healthcare Information Network (PHIN) UK – where we produce a data set of all patient episodes approaching HES-equivalency and submit this to PHIN for publication.

This data (once PHIN is fully established and finalised) will be made available to common standards for inclusion in comparative metrics, and is published on the PHIN website [http://www.phin.org.uk](http://www.phin.org.uk).
This website gives patients information to help them choose or find out more about an independent hospital including the ability to search by location and procedure.

**Safety**

**Infection Prevention and Control**

The focus on Infection Prevention and Control continues under the leadership of the Group Head of Infection Prevention and Control, in liaison with the link nurse in BMI The Manor Hospital.

The focus on Infection Prevention and Control continues under the leadership of the Group Director of Infection Prevention and Control and Group Head of Infection Prevention and Control, in liaison with the Infection Prevention and Control Lead.

Between April 2016 to March 2017, the hospital had:

- Zero MRSA bacteraemia cases/100,000 bed days
- Zero MSSA bacteraemia cases /100,000 bed days
- Zero E.coli bacteraemia cases/ 100,000 bed days
- Zero cases of hospital apportioned Clostridium difficile in the last 12 months.

- SSI data is also submitted to Public Health England for Orthopaedic surgical procedures. Our rates of infection are;
  - Zero cases for Hips
  - Zero cases for Knees

Within the reporting period seven care bundles are audited including pre-operative, intra-operative, post-operative, urinary catheterisation, urinary catheter ongoing care, peripheral cannulation and peripheral cannula ongoing care.
Include any focused activities on hand hygiene, aseptic non touch technique and other infection prevention activities.

Environmental cleanliness is also an important factor in infection prevention and our patients rate the cleanliness of our facilities highly.

Patient Led Assessment of the Care Environment (PLACE)

At BMI Healthcare, we believe a patient should be cared for with compassion and dignity in a clean, safe environment. Where standards fall short, they should be able to draw it to the attention of managers and hold the service to account. PLACE assessments will provide motivation for improvement by providing a clear message, directly from patients, about how the environment or services might be enhanced.

Since 2013, PLACE has been used for assessing the quality of the patient environment, replacing the old Patient Environment Action Team (PEAT) inspections.

The assessments involve patients and staff who assess the hospital and how the environment supports patient’s privacy and dignity, food, cleanliness and general building maintenance. It focuses entirely on the care environment and does not cover clinical care provision or how well staff are doing their job.

The results will show how hospitals are performing nationally and locally.
Positive feedback given by assessors and since this audit the condition and appearance of the hospital has been improved with internal and external decoration. Dementia training has been facilitated for all staff to raise awareness.

Duty of Candour

A culture of Candour is a prerequisite to improving the safety of patients, staff and visitors as well as the quality of Healthcare Systems.

Patients should be well informed about all elements of their care and treatment and all staff have a responsibility to be open and honest. This is even more important when errors happen.

As part of our Duty of Candour, we will make sure that if mistakes are made, the affected person:

- Will be given an opportunity to discuss what went wrong.
- What can be done to deal with any harm caused.
- What will be done to prevent it happening again.
- Will receive an apology.

To achieve this, BMI Healthcare has a clear policy - BMI Being Open and Duty of Candour policy.

We are undertaking a targeted training programme for identified members of staff to ensure understanding and implementation in relation to the Duty of Candour.

All hospital staff are more aware of the Duty of Candour process and this if followed when applicable following any incidents or raised concerns. Lessons learnt are shared through all hospital committees and departmental meetings with minutes available for all staff to read.

A total of nine Duty of Candour related incidents within the time frame for this report were documented and procedure followed appropriately with patients being fully informed.
**Venous Thrombo-embolism (VTE)**

BMI Healthcare holds VTE Exemplar Centre status by the Department of Health across its whole network of hospitals including, BMI The Manor Hospital. BMI Healthcare was awarded the Best VTE Education Initiative Award category by Lifeblood in February 2013 and was the Runners up in the Best VTE Patient Information category.

We see this as an important initiative to further assure patient safety and care. We audit our compliance with our requirement to VTE risk assessment every patient who is admitted to our facility and the results of our audit on this has shown

![Venous Thromboembolism (VTE) Risk Assessments](image)

BMI The Manor Hospital reports the incidence of Venous Thromboembolism (VTE) through the corporate clinical incident system. It is acknowledged that the challenge is receiving information for patients who may return to their GPs or other hospitals for diagnosis and/or treatment of VTE post discharge from the Hospital. As such we may not be made aware of them. We continue to work with our Consultants and referrers in order to ensure that we have as much data as possible.

**Sign Up for Safety Campaign**

In December 2015 BMI Health applied to Sign up for Safety by submitting our actions for the following five pledges:

- **Put safety first** – Committing to reduce avoidable harm in the NHS by half through taking a systematic approach to safety and making public your locally developed goals, plans and progress. Instill a preoccupation with failure so that systems are designed to prevent error and avoidable harm.
• **Continually learn** – Reviewing your incident reporting and investigation processes to make sure that you are truly learning from them and using these lessons to make your organisation more resilient to risks. Listen, learn and act on the feedback from patients and staff and by constantly measuring and monitoring how safe your services are.

• **Be honest** – Being open and transparent with people about your progress to tackle patient safety issues and support staff to be candid with patients and their families if something goes wrong.

• **Collaborate** – Stepping up and actively collaborating with other organisations and teams; share your work, your ideas and your learning to create a truly national approach to safety. Work together with others, join forces and create partnerships that ensure a sustained approach to sharing and learning across the system.

• **Be supportive** – Be kind to your staff, help them bring joy and pride to their work. Be thoughtful when things go wrong; help staff cope and create a positive just culture that asks why things go wrong in order to put them right. Give staff the time, resources and support to work safely and to work on improvements. Thank your staff, reward and recognise their efforts and celebrate your progress towards safer care.

BMI Healthcare as a company was successful in their application with Sign up for Safety in March 2016. Sign up for safety is a campaign to make all our healthcare services the safest in the world. Whilst predominantly focused on the NHS the campaign welcomes independent healthcare companies or individual hospitals to participate to make all healthcare services safer. The ambition of sign up to safety is to halve avoidable harm over the next three years and save 6,000 lives as a result.

By signing up to the campaign we have committed to listening to patients, carers and staff, learning from what they say when things go wrong and taking action to improve patient’s safety helping to ensure patients get harm free care every time, everywhere.

**Risk Management System**

In December 2016, BMI Healthcare changed its Risk Management System. **RiskMan** is now used across the company, within 70 different locations for the capturing of:

• Events (Incidents & Expected Patient Deaths)

• Feedback (Complaints, Queries & Compliments)

• Risks
• Legal Claims

During 2017, further modules will be introduced which include a Safety Alerts functionality, a Policy Library and also a dedicated CQC module which BMI Healthcare will be tailoring to the very specific nature of CQC Inspections and Key Lines of Enquiry (KLOEs).

The change of system has been met with unanimous support across the company, allowing for faster and easier incident entry and much improved reporting capabilities. The change of Risk Management System has seen around a 50% increase in incident reporting on the whole and a significant change of reporting culture is being felt across the company as a result.

With the change of Risk Management System, BMI Healthcare has also taken the opportunity to revisit its incident and complaint processes and policies in order to improve these in line with the new system.

The system is available to all BMI Healthcare employees at point of entry leading to much swifter incident investigations, action completion and closure.

Risk Registers

As part of the implementation of a new Risk Management System, RiskMan, BMI worked diligently to implement a new Risk Register process within all of its hospitals that strengthened the approach to managing risk and responded to feedback from the CQC.

This new process allows for greater transparency of risks across all levels, from department to hospital to corporate risks. RiskMan allows for improved risk monitoring and overview, ensuring that Heads of Department & Senior Management Teams are supported to discuss risk at relevant committees and meetings with readily available information and reports.

The Executive team and Governance Committee identified risks which affect BMI Healthcare and from these risks a subset was identified that cascaded to hospitals. This ensures that organisation risks and strategies to mitigate these are monitored and actioned across all hospitals. It also allows hospitals to identify department and site specific issues and how these affect both the hospital and the overall strategic objectives of the company as a whole.

Reducing the requirement for paper versions of Risk Registers, RiskMan holds all Corporate, Hospital & Departmental Risk Registers in the system so that they are accessible easily by hospital and corporate staff for reviewing as appropriately.

Having worked closely with the CQC on this process, BMI Healthcare has received encouraging feedback on this approach from both an internal and external level and continues to implement this new way of working across its hospitals.
**Effectiveness**

**Patient Reported Outcome Measures (PROMS)**

Patient Reported Outcome Measures (PROMs) are a means of collecting information on the effectiveness of care delivered to NHS patients as perceived by the patients themselves. PROMs are a Department of Health led programme.

For the current reporting period, the tables below demonstrate that the health gain between Questionnaire 1 (Pre-Operative) and Questionnaire 2 (Post–Operative) for patients undergoing hip replacement and knee replacement. At BMI The Manor Hospital all our patients are Pre-Assessed prior to their admission by competent nursing staff and most MSK patients are Pre-Assessed by Physiotherapists who ensure they are fully aware of the procedure whilst an inpatient and their post-operative rehabilitation programme for a positive outcome. All patients have a discharge plan developed in Pre-Assessment and communicated through the team, thus ensuring the patient is given the same information throughout their journey compliments the good outcomes achieved. All this helps the patient understand the process and enable them to make their own informed decisions.

**Latest PROMs data available from HSCIC (Period: April 2015 – March 2016)**
**Enhanced Recovery Programme (ERP)**

The ERP is about improving patient outcomes and speeding up a patient's recovery after surgery. ERP focuses on making sure patients are active participants in their own recovery and always receive evidence-based care at the right time. It is often referred to as rapid recovery, is a new, evidence-based model of care that creates fitter patients who recover faster from major surgery. It is the modern way for treating patients where day surgery is not appropriate.

ERP is based on the following principles:

1. **All Patients are on a pathway of care**
   - Following best practice models of evidenced-based care
   - Reduced length of stay

2. **Patient Preparation**
   - Pre Admission assessment undertaken
   - Group Education sessions
   - Optimizing the patient prior to admission – i.e. HB optimisation, control co-morbidities, medication assessment – stopping medication plan.
   - Commencement of discharge planning

3. **Proactive patient management**
   - Maintaining good pre-operative hydration
   - Minimising the risk of post-operative nausea and vomiting
   - Maintaining normothermia pre and post operatively
   - Early mobilisation

4. **Encouraging patients have an active role in their recovery**
   - Participate in the decision making process prior to surgery
   - Education of patient and family
   - Setting own goals daily
   - Participate in their discharge planning

We have an active Enhanced Recovery Programme led by our Physiotherapists who ensure all patients are safely rehabilitated and discharged within recommended time frame for their procedure. Our length of stay for joint replacements is 2.8 days, improved with early mobilization and patient knowledge of expectations.
**Unplanned Readmissions & Unplanned Returns to Theatre.**

Unplanned readmissions and Unplanned Returns to Theatre are normally due to a clinical complication related to the original surgery.

**Complaints**

In addition to providing all patients with an opportunity to complete a Satisfaction Survey BMI The Manor Hospital actively encourages feedback both informally and formally. Patients are supported through a robust complaints procedure, operated over three stages:

Stage 1: Hospital resolution
Stage 2: Corporate resolution
Stage 3: Patients can refer their complaint to Independent Adjudication if they are not satisfied with the outcome at the other 2 stages.
Main theme of complaints in 2017 revolve around patients not receiving full communication from various parties and therefore unaware of process. This involves consultants, nurses and physios. All complaints are taken seriously and fully investigated and feedback provided to the complainant as appropriate within an acceptable time frame. All complaints are discussed at Hospital Clinical Governance Committee, MAC, individual hospital departmental meetings and at the daily Comm cell meetings for lesson learnt to be shared.

CQUINS

CQUINS for BMI The Manor hospital in 2016/17 include Antimicrobial Stewardship, patient satisfaction, development of patient forums, and physiotherapy outcomes. All results have been positive with reports provided to CCG within schedule.

Safeguarding

Safeguarding is about protecting people from abuse, prevent abuse from happening and making people aware of their rights. To enable us to do this better training has been enhanced and made available for staff and consultants within the hospital.

Adult abuse can happen to anyone over the age of 18 years of age and within BMI our staff are trained to adult safeguarding level 2, so they can identify, support and advise anyone who requires it.

Adult safeguarding level 3 is provided to senior members of the team to ensure that appropriate.

Children and Young people abuse can happen to any person 18 years old or below and to ensure that all children and young peoples are looked after appropriately all our clinical staff including consultants are trained to Level 3 children’s safeguarding our other staff members are trained to level 2.

Senior registered Nurses are trained to level 4 safeguarding (if applicable)

BMI The Manor Hospital has had no safeguarding incidents to report within 2016/17.

VTE Exempler Status

BMI Healthcare holds VTE Exemplar Centre status by the Department of Health across its whole network of hospitals including BMI The Manor Hospital. BMI Healthcare was awarded the Best VTE Education Initiative Award category by Lifeblood in February 2013 and was the Runners up in the Best VTE Patient Information category.

We see this as an important initiative to further assure patient safety and care. We audit compliance with our requirement to VTE risk assessment every patient who is admitted to the hospital. BMI The Manor Hospital reports the incidence of Venous Thromboembolism (VTE) through the corporate clinical incident system. It is acknowledged that the challenge is receiving information for patients who may return to their GPs or other hospitals for diagnosis and/or treatment of VTE post discharge from the Hospital. As such we may not be made aware of them. We continue to work with our Consultants and referrers in order to ensure that we have as much data as possible.
Antimicrobial Stewardship

Antimicrobial guidelines are in use across the hospital which details the medication to be used in clinical situations. Audit has illustrated 100% adherence to the guidelines and the adoption of the Public Health England initiative.

BMI Healthcres Safer Surgery Commitment

BMI Healthcare commissioned an external review of Never Events that had taken place across the business in 2015/16. In response to these key findings, BMI Healthcare has developed a ‘Safe Surgery Commitment’, as a commitment to ensure we are safe, effective, responsive, caring and well-led provider of healthcare. The ‘Safer Surgery Commitment’ incorporated the National Safety Standards for Invasive Procedures (NatSSIPs) and was developed in conjunction with the Theatre Managers to ensure practitioner involvement.

The main areas for commitment are:

1. Strengthen corporate safety management systems
2. Policy review
3. Improve incident investigation reports
4. Reward staff for safety
5. Build resilience into theatre teams, including action to mitigate the risks associated with non-substantive and novice staffing
6. Address reasons for non-concordance

Progress has been measured against the standards and each site has recently undertaken a review of the implementation of the ‘Safer Surgery Commitment’ to ensure these have been implemented.

National Clinical Audits

BMI The Manor Hospital participates in the National Joint Registry and for 2017 information has been collected from a total of 98 patients to date divided into the specialties listed below.

Priorities for Service Development and Improvement

Development of the Endoscopy unit initiative continues with completion of required audits working towards JAG accreditation. Introduction of the Ambulatory Care model utilizing the Endoscopy area for local anesthetic procedures along with developing the endoscopy service is also being developed.

Reintroduction of the breast care service with the installation of the mammography unit within our imaging department and development of one stop breast services has commenced.

An audit by Action from Hearing Loss was undertaken as part of the process to gain an accreditation as a hospital friendly organization for deaf people. A total review of the facilities in the hospital and processes in place was undertaken and improvements made over 2016/17. A revisit by Action from Hearing Loss is planned this year and a decision will be made if we have met the criteria to be accredited.

Recruitment of contracted and bank staff across all departments has made a positive move with the reduction in agency use over 2016/17.

Quality Indicators

The below information provides an overview of the various Quality Indicators which form part of the annual Quality Accounts. Where relevant, information has been provided to explain any potential differences between the collection methods of BMI Healthcare and the NHS.

All data provided by BMI Healthcare is for the period April 2016-March 2017 to remain consistent with previous Quality Accounts, whilst the NHS data may not be for the same period due to HSCIC data availability. The NHS data provided is the latest information available from the HSCIC Indicator Portal.

**Re-Admissions within 28 Days of Discharge (Paediatric and Adult)**

![Re-Admissions graph](chart.png)
The Manor Hospital considers that this data is as described for the following reasons Pre-Assessment of all patients and process of every person who is in contact with the patient provides the same information. This ensures the patient expectation is met and all questions answered appropriately. NB there will always be a small percentage for unforeseen complications.

The Manor Hospital does not see or treat patients under the age of 16 years, therefore no data for Paediatric services.

The Manor Hospital considers that this data is as described for the following reasons staff are proud to work for The Manor Hospital and work together as a team.

The Manor Hospital always listens to staff views and thoughts through staff forums and the Senior Management visibility.
The rate per 100,000 bed days of cases of C. difficile infection reported within the hospital

C. difficile Cases (Rate per 100,000 Bed Days)

The Manor Hospital considers that this data is as described for the following reasons:

- The Infection Prevention and Control Lead ensures staff follow all appropriate protocols and facilitates regular training sessions with all staff.
- Single accommodation with en-suite facilities reduces the risk with the antimicrobial use also observed.

Hospitals responsiveness to the personal needs of its patients

Responsiveness (Patient Satisfaction)

The Manor Hospital considers that this data is as described for the following reasons with competent staff and excellent facilities to ensure the patients receive a safe, caring, responsive, effective, and well-led experience.

All patient satisfaction results are reviewed, discussed and action planned formulated to share learnings through our Quality team.
The percentage of patients who were admitted to hospital and who were risk assessed for VTE (Venous Thromboembolism).

The Manor Hospital considers that this data is as described for the following reasons all patients are assessed at Pre-Assessment and on the ward with mechanical and pharmaceutical prophylaxis to compliment early mobilisation programme in place ensuring all policies are followed and reduce the likelihood of any VTE.

**Patient Safety Incidents**
The Manor Hospital considers that this data is as described for the following reasons all risk assessments are in place and Health and Safety is considered a priority not only with patients but also staff, visitors and consultants.
All Safety Incidents are thoroughly investigated and lessons learnt shared through the active Safety, Health and Environment Committee.

**Further Quality Indicators**

**Patient Recommendation Results**

The Manor Hospital considers that this data is as described for the following reasons the results are above the national average and are constantly reviewed and discussed with the quality team and at Hospital Governance.
Statement from Bedfordshire Clinical Commissioning Group to BMI Healthcare
The Manor Hospital Quality Account 2016 – 2017

Bedfordshire Clinical Commissioning Group (BCCG) has received 2016/2017 Quality Account from BMI Healthcare, The Manor Hospital.

Reviewing the Trusts quality accounts from 2016/17 and the associated priorities, BCCG is aware of how these priorities were formed to align with quality priorities and areas requiring improvement from CQC inspections. As commissioners we are aware of the learning from CQC inspection and the work that has been put in place to improve specific areas.

BCCG welcomes the continuing opportunity that BMI have outlined to focus on achieving good quality outcomes for 2017/18.

Anne Murray
Director of Quality and Nursing
